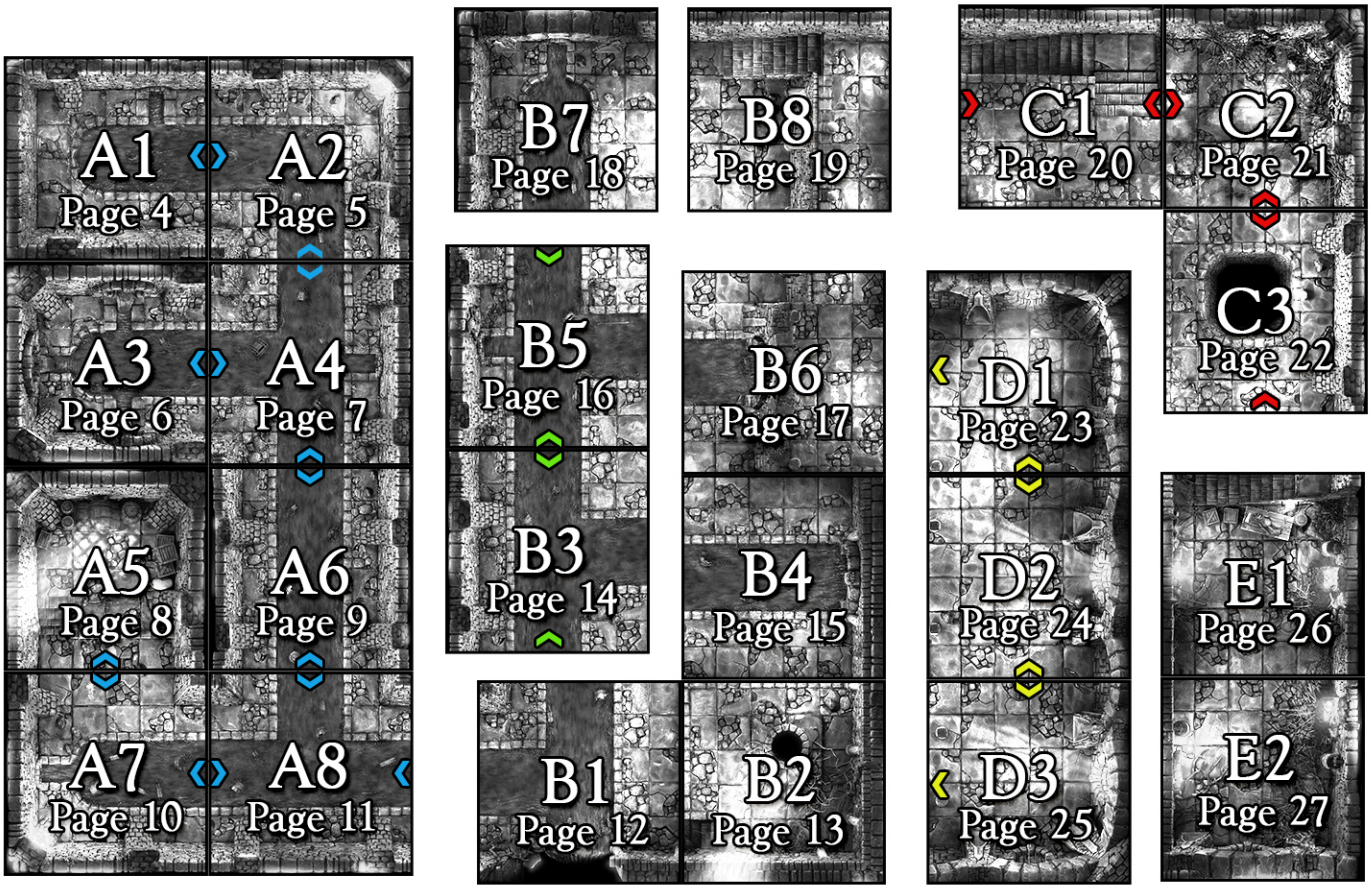
SEWER MAP-TILES

Size: 36”x24”

ASSEMBLY INSTRUCTIONS

For the printing: This file is set up for
US letter-sized (8.5”x11”) sheets.
Turn off any ’fit to page’ options in your printer driver.
If you are printing A4-sized sheets, you may want to
reduce the print size to 95% of the original
(depends on your printer, print a test page first).



Mixable sewer parts.
You will find X
connection and
alternative tiles in the
’Sewer Tiles’ folder.

Inner corner tiles are in the
’Sewer Tiles’ folder.
(You can build up a boss
room with them.)

Tiles with the little arrow (❯) signs at their border are seamless and you can change and mix them with each other to extend the map or make new areas.
You can lay down the other special and unique areas only to next to each other.

If you can, use photo paper to print; you’ll really enjoy these maps this way. If you print them in pieces, glue them on foam or cardstock, they’ll fit together easily and store more easily afterwards.
In a print shop you can print the map in poster size with greater quality.

Black Scrolls Games

Toggle between the two versions with layers and print out the tiles you need.
