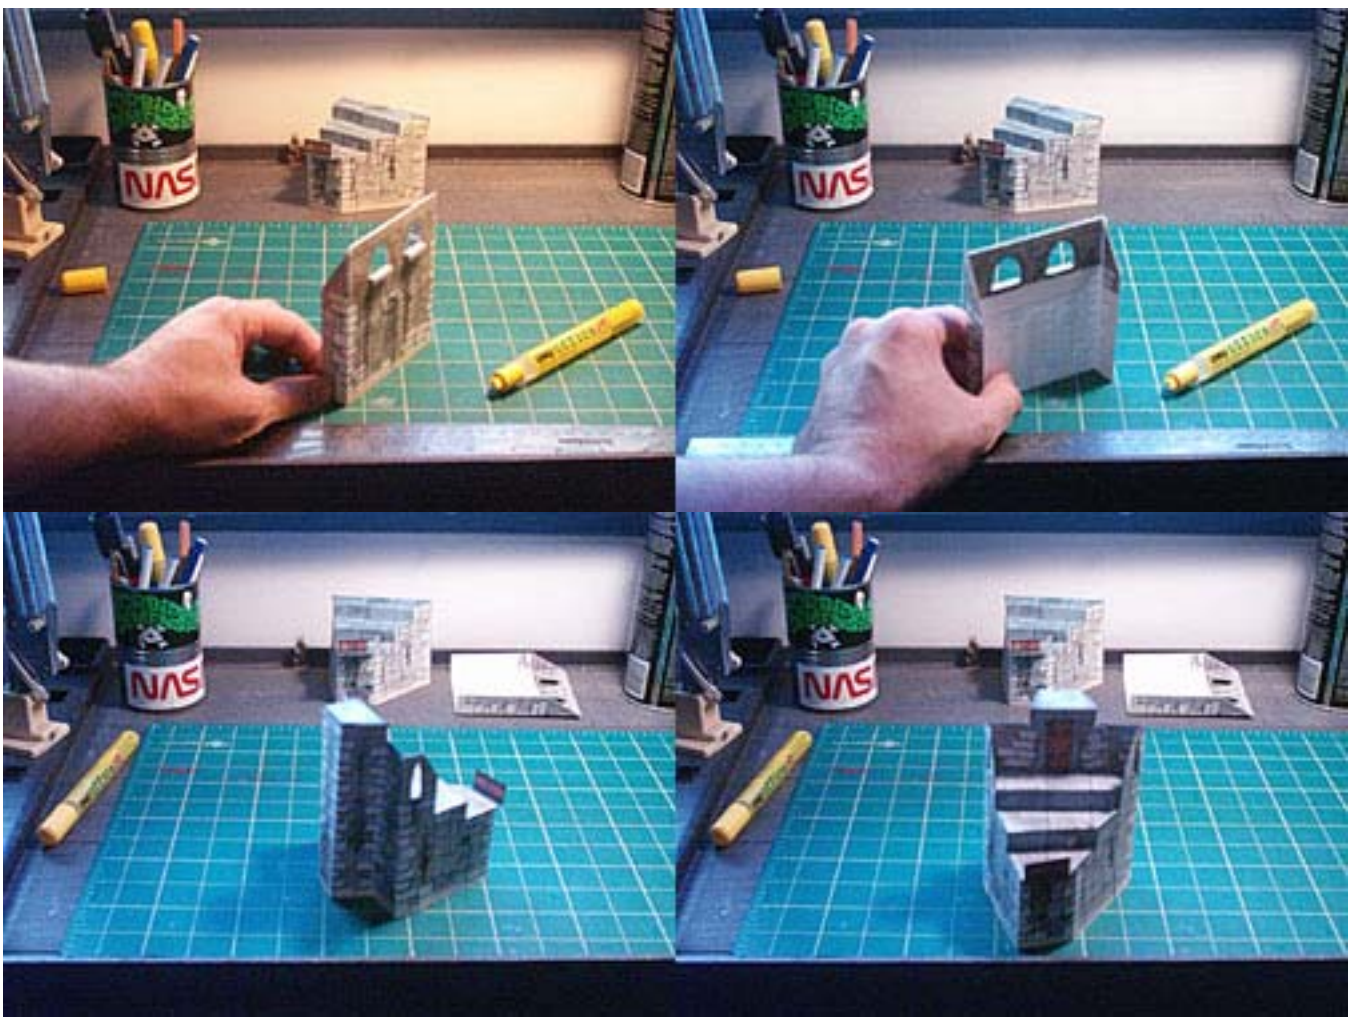
MODEL TYPE:	**45 DEGREE CORNER-BACKS**
DIFFICULTY:	**3 out of 5**
APPROX BUILD TIME:	Quick - 5 to 10 minutes ***(Time may vary depending on skill level)***
DUPLICATIONS *(Suggested)*:	**2 to 4 copies** *(optimal)*
EDGING COLOR:	**Grey or Black felt** *(What is **"Edging"?** Please refer to the included **"Beginners Guide".***

You have a choice of 45 Degree Corner backs, the "Plain" and "Tower versions.
Each will fit the left or right hand corners.

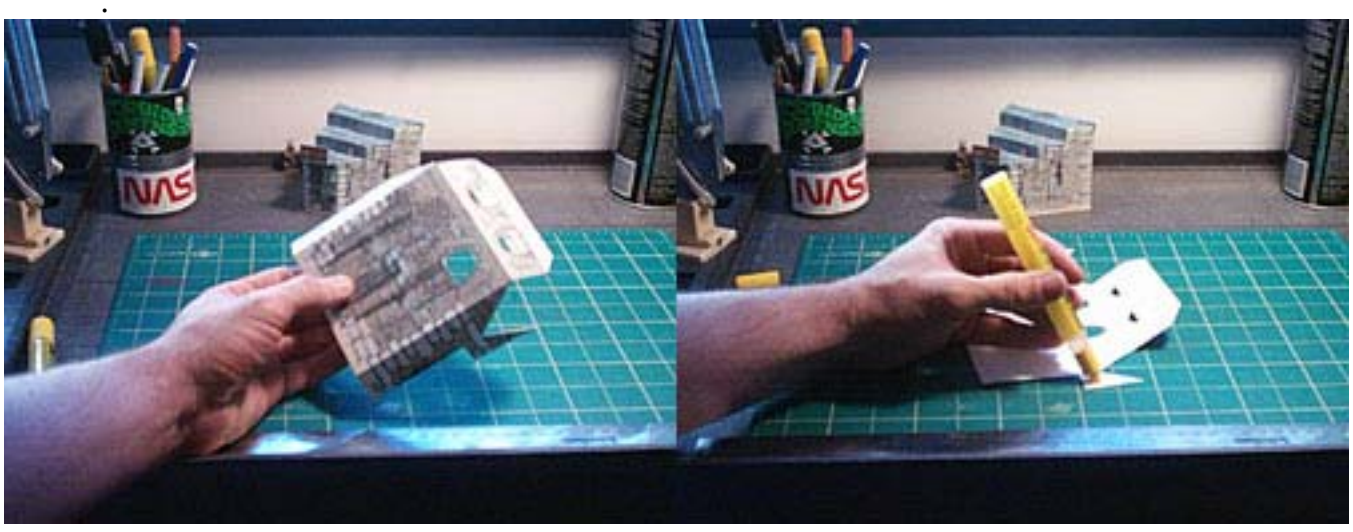


Plain Back

STEP 1:

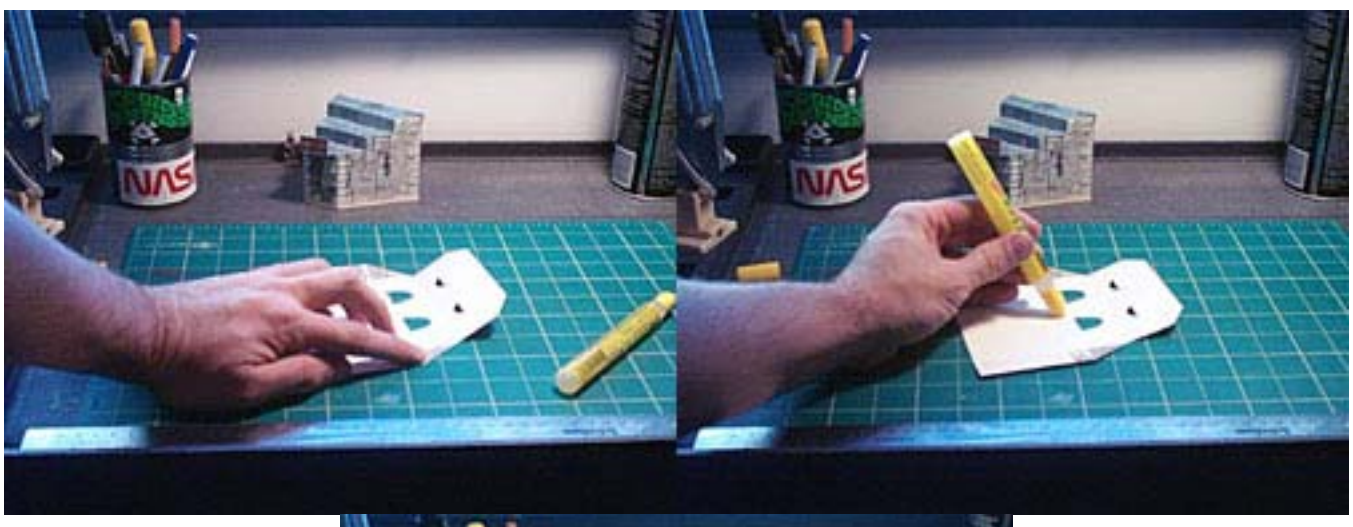
Cut and score your models as noted. This model features optional windowsills, see the instruction sheet for the "Terrace Back" for assembly.

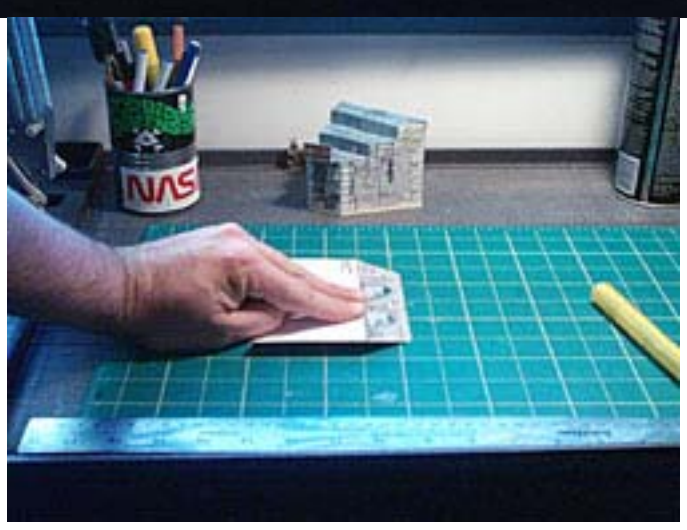
.



Step 2:

Apply glue to the triangular flaps on the sides and fold them over. Apply glue to the reverse of the window frames. Fold the top over and press hard.

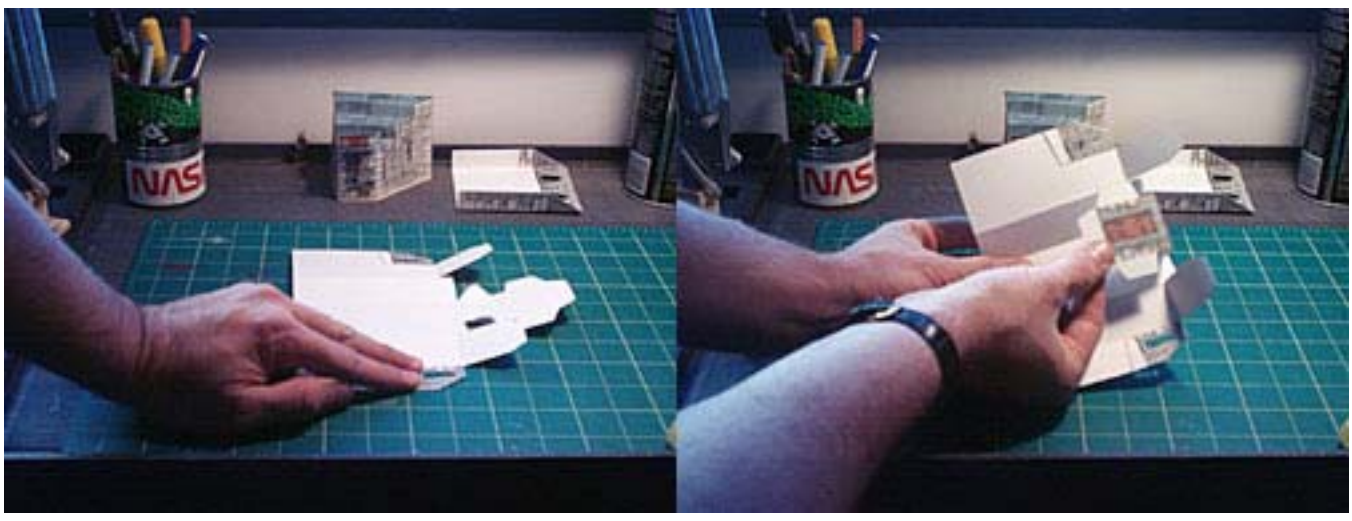




Tower Back

STEP 1:

Cut and Score your models as noted, before you cut read step two below. This model features optional windowsills, see the instruction sheet for the Terrace Back. Apply glue to the triangular flaps on the sides and fold them over. Fold the part with the door over as shown in the picture below.

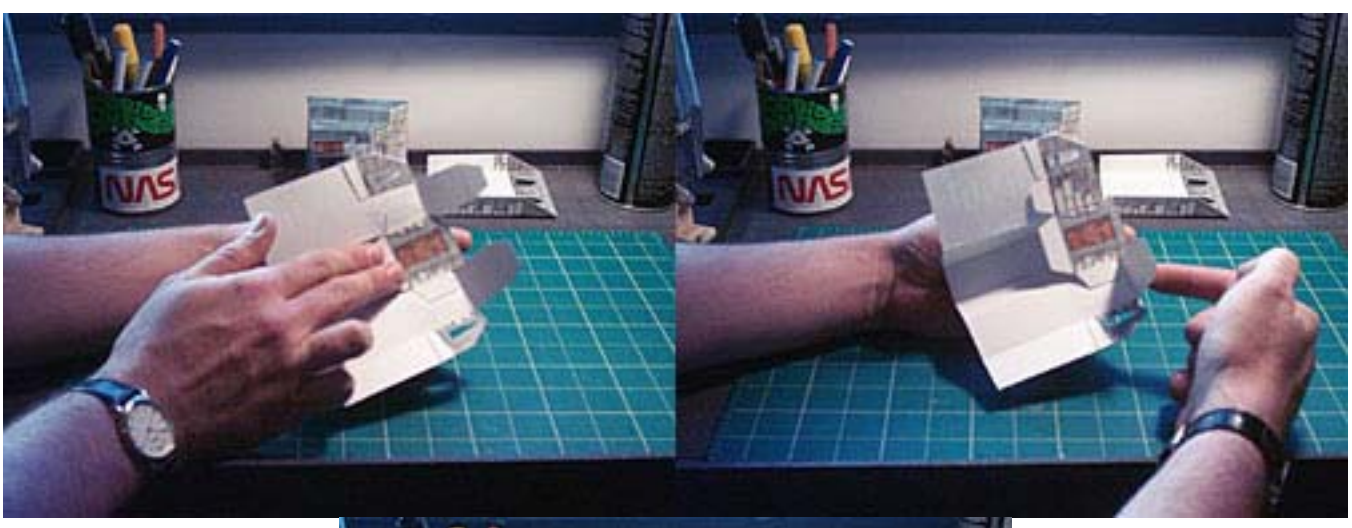


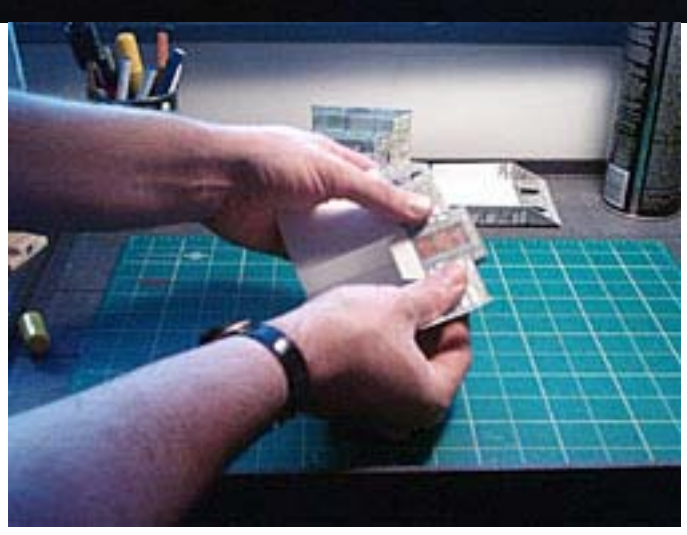
Step 2:

If your printer lets you, leave a little bit of card poking below the door {1/2" or so}, I'm pointing to it in the first picture. It will make the completed structure a bit more stable. Apply glue to both sides of the flaps beside the door.

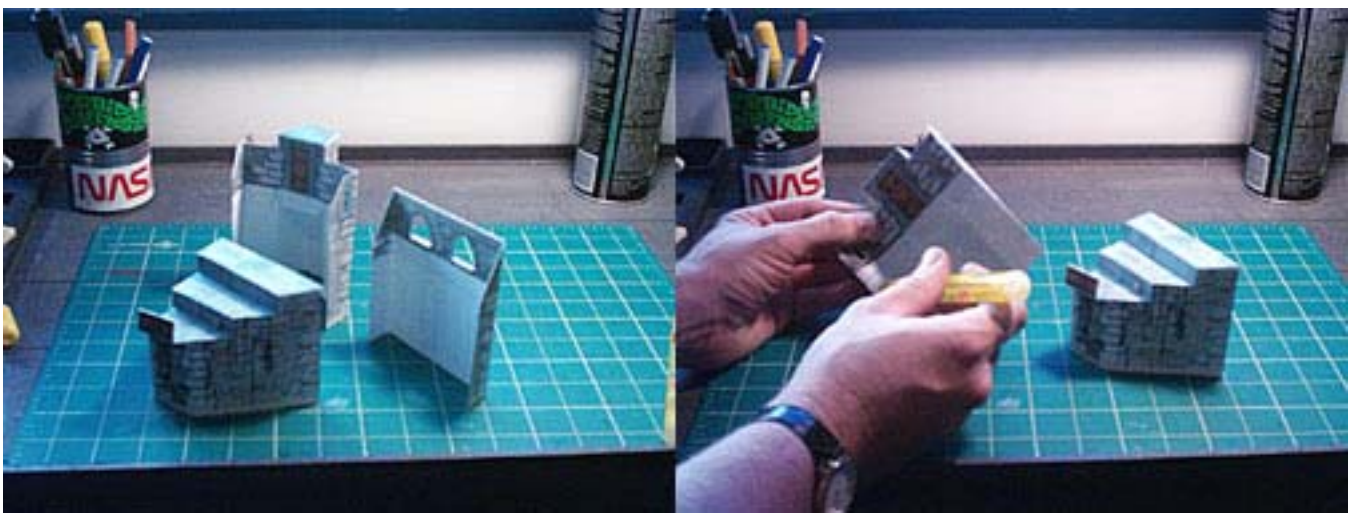
Step 3:

Here's the tricky bit. Fold the door over as you tuck the top tabs in and form the tower shape. Whew! Fold over the two tabs that are sticking up, and while the glue sets work all the parts into place as in the bottom picture.





Joining Back to Front



Step 1:

Select your back and run glue around the inside edge. Glue the flap on the front piece and press firmly until the glue sets.
