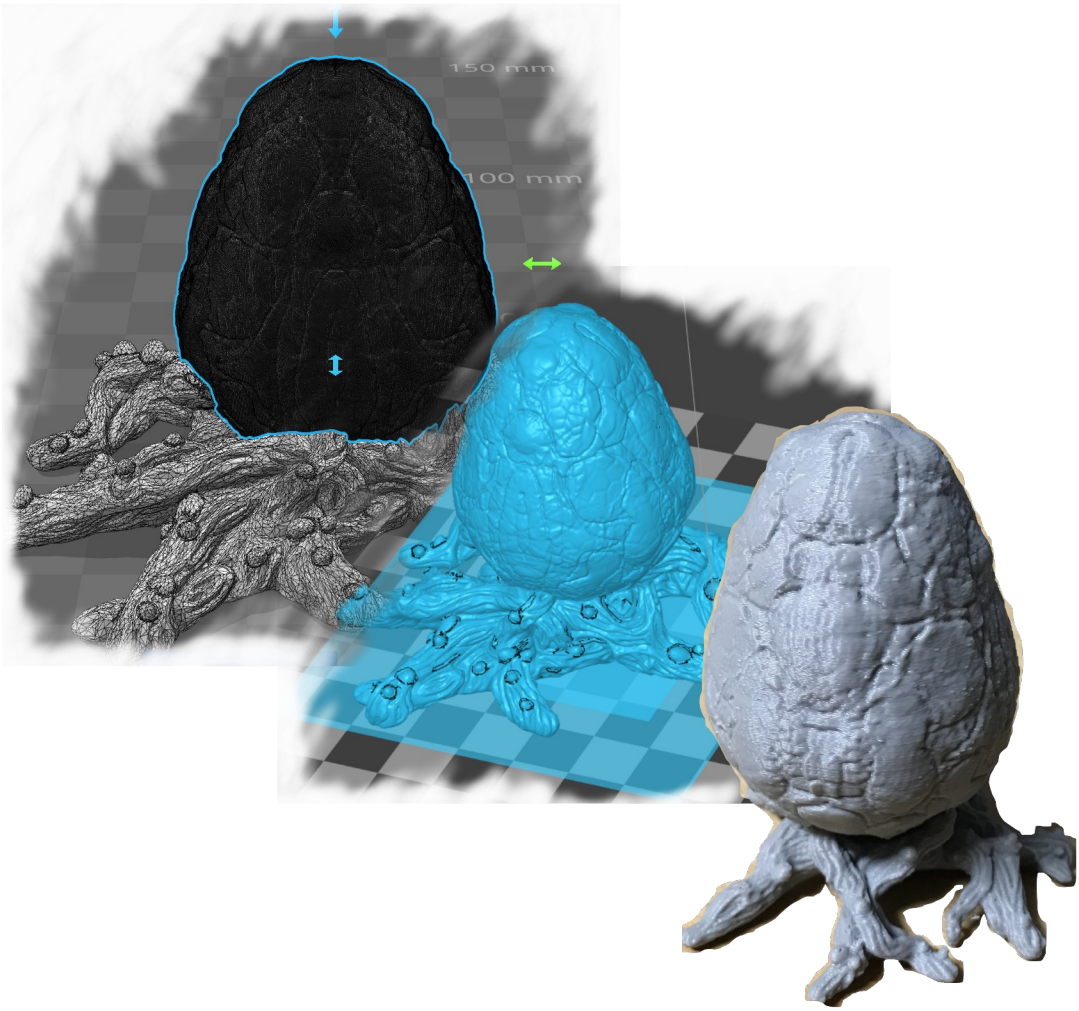
ALIEN POD WITH BASE



FUTURE WORLDS
AS REAL AS YOU CAN MAKE IT

Arid Hills Gaming

Welcome to our Future Worlds 3D printable product line and thank you for buying this product. We aim to provide you with high quality and low cost .STL files which you can use to make your own war gaming, skirmish, RPG and general tabletop gaming scenery.

In order to help you get the most out of our models there are some things that we would recommend:

- ALWAYS use a raft for these models – the bases on both of these models are not flat and a raft will assist in preventing failed prints.
- Always use support structures – there are overhangs on both models. Although it is possible to print without support structures the chance of failure is significantly higher and the finished model will not be as defined on the undersides.
- Don't print a solid model – use an internal honeycomb structure to reduce the amount of filament you use while maintaining good strength.

Files in this product:

- Alien Pod.stl
- Tendril Base.stl

Should you have any issues with this product or require assistance, please contact us via either email at: aridhills@gmail.com or on our Facebook page: https://www.facebook.com/AridHillsGaming

We hope you enjoy this product – feel free to give us feedback, your thoughts and suggestions as to the types of scenery you'd like us to think about making.

Happy printing!
