

FDG COMMUNITY CREATOR - DM SCREEN SKULL DICE TRAY

ACKNOWLEDGEMENTS & INSTRUCTIONS

My name is William Walker. I have made **a few sets** for the Dragonbite Terrain system. Thank you for buying this set and supporting my work. Please click the link above to check out my others sets, I've been busy this past year. If for any reason you need to contact me about these or any other tiles, please don't hesitate to email me at rbdmwill@gmail.com

This set, GM Screen Skull Dice Tray, is available thanks to the support of my **Patreons**. This set would not have been possible without the work of Peter Kirylo, Sr. He will share in the royalties for this set, as he is due for his wonderful circle tray model I needed to craft it. I look forward to working with him again to bring great models to this community. I'd also like to say thank you to the many CC-AO artists who contributed to art in my other sets. I try to be thorough with my attribution and apologize for any errors.

Thank you to Colin Christenson, Aaron Mulder, and Jacob Armour. I love working with you guys. Thank you to Nora for all her efforts and special support. Thank you to everyone who supports me and the other community designers with praise, constructive ideas, and financial support (like you!). Last in line, but first in my heart, thank you to my wife for giving up so much time to let me pursue this passion. Thank you to my brother Rob, my sister Lane, and the rest of my family for their constant support and interest in my work.

For this set you'll want to make note of the following special instructions:

Printing instructions.

6 top layers minimum suggested for this model.

10% Infill recommended for this model to support the large floor.

Supports should not be needed, but you may need to trim a line of loose filament near the top of the mouth arch.

The follow elements are used in multiple titles I have released. I want to take the opportunity to thank them.
