SMART SLIDE™ DOORS

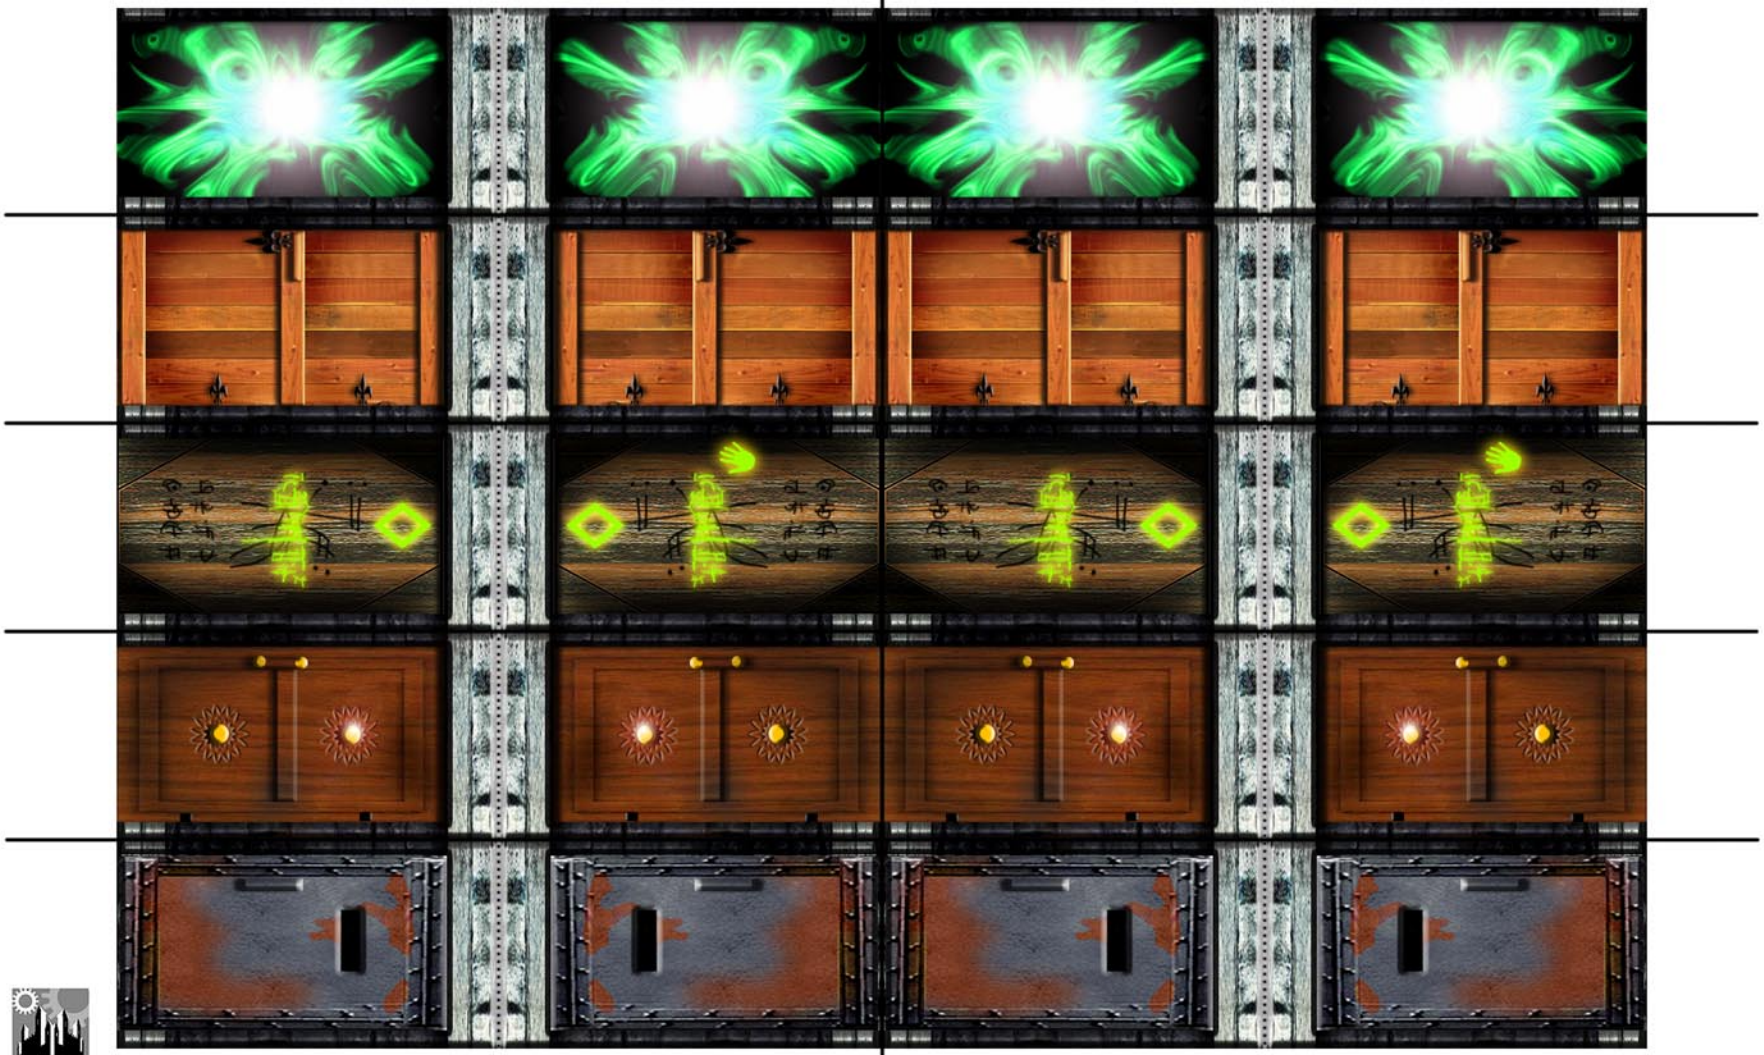

Difficulty Rating (Out of 10): 1 (Smart Slide doors are a very simple device for placing door markers anywhere on any corridor section. Simply drop them on and they conform perfectly to the angle and sweep of the wall)

Recommended Duplications: 1 sheet (Depending on how door crazy you want to get chances are you will only need one sheet)

Steps:

- Cut along black border. Be sure to cut straight through the dominant black lines separating the models. There are 10 doors on one sheet.
- Score and fold along the center line of the doors
- To ensure a secure fit on the walls crease your fold nice and hard. This will force the door to lay flush with the walls.

That's it! Now drop them anywhere you want them!
