GLUING NOT NECESSARY

COMPLETED

NOTES

The model parts are split between two PDF files: **Corestructure.pdf** contains the 8 frames needed to build the entire central support core. **Podring.pdf** contains the 5 frames needed to build one full pod ring.

To build this model as shown in the instructions, you will want to print one copy of corestructure.pdf and four copies of podring.pdf.

To provide some variety, several variant balconies, side walls, capsules, doorways, and signage items are included:

- Balconies with trash and blood spatters
- Side walls with graffiti, broken/damaged glass doors, empty light sockets, and poop-smeared rants against fornicators and sinners
- Capsule shells with cracked glass, foil-lined windows, and duct-taped cracks
- 2 alternate toppers: one showing a peaceful mountain vista, another in deactivated state
- Side signage in one alternate “Sleep Like A Log” advertisement and 2 broken-glass versions
- Entranceways with dodgy escort service and restaurant ads, in both open for business and closed for business versions
