The standees (paper miniatures) included in this set have two different ways to build them, depending on if you prefer a quick, simple build or a more flexible end result.

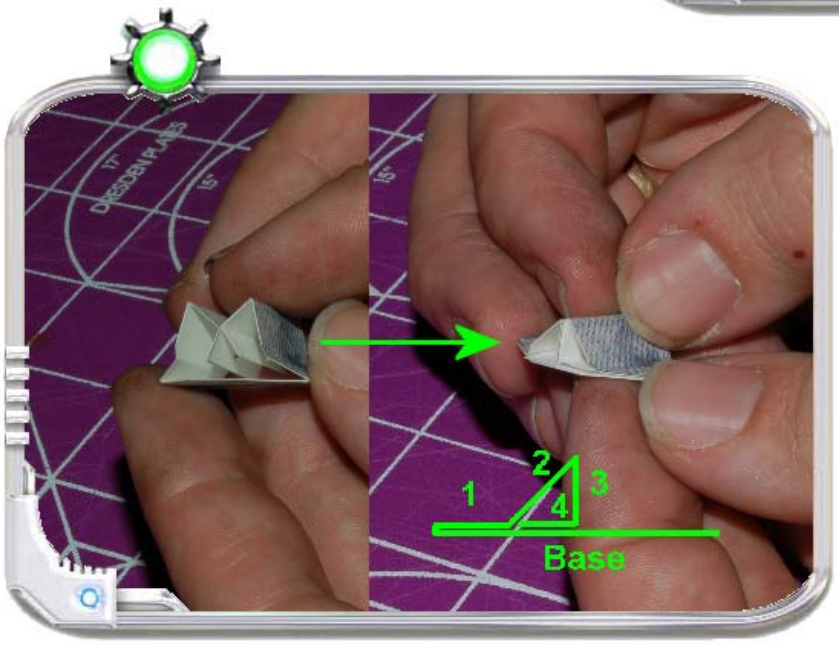

For the simple standees, print only the regular page of standees themselves. Ignore the red lines, and cut, score, and fold according to the green marks.

The standee makes a simple “inverted T” shape

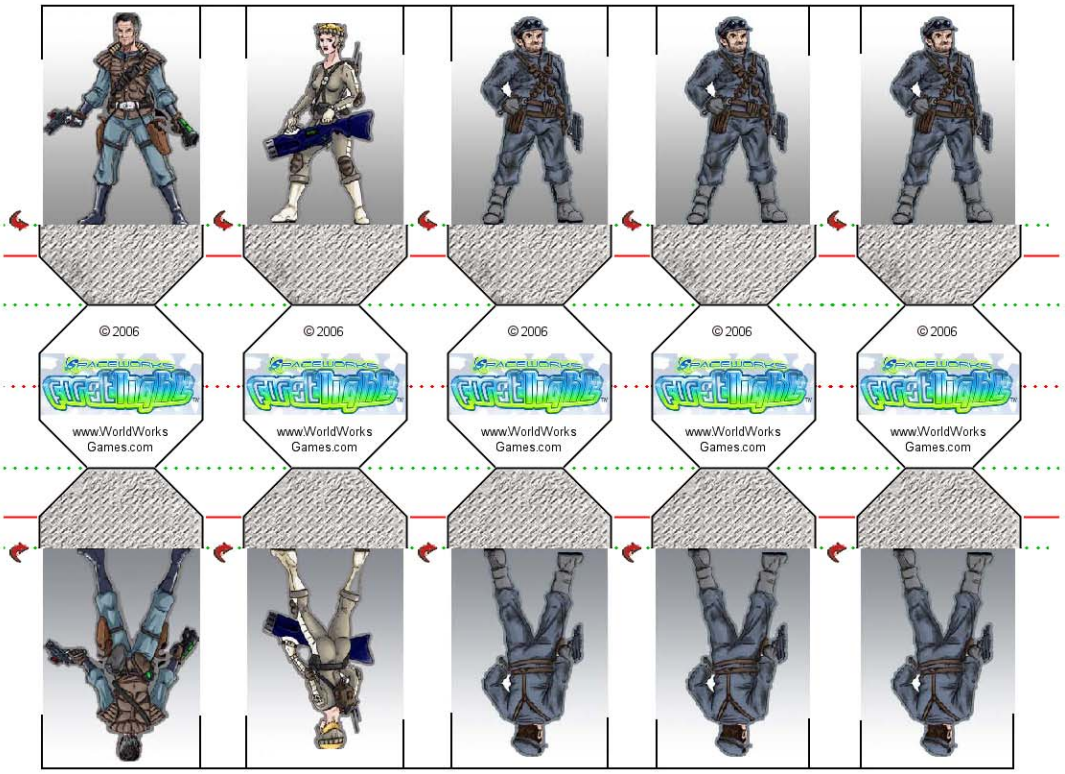

The complex standees require you to print out a page of bases as well.

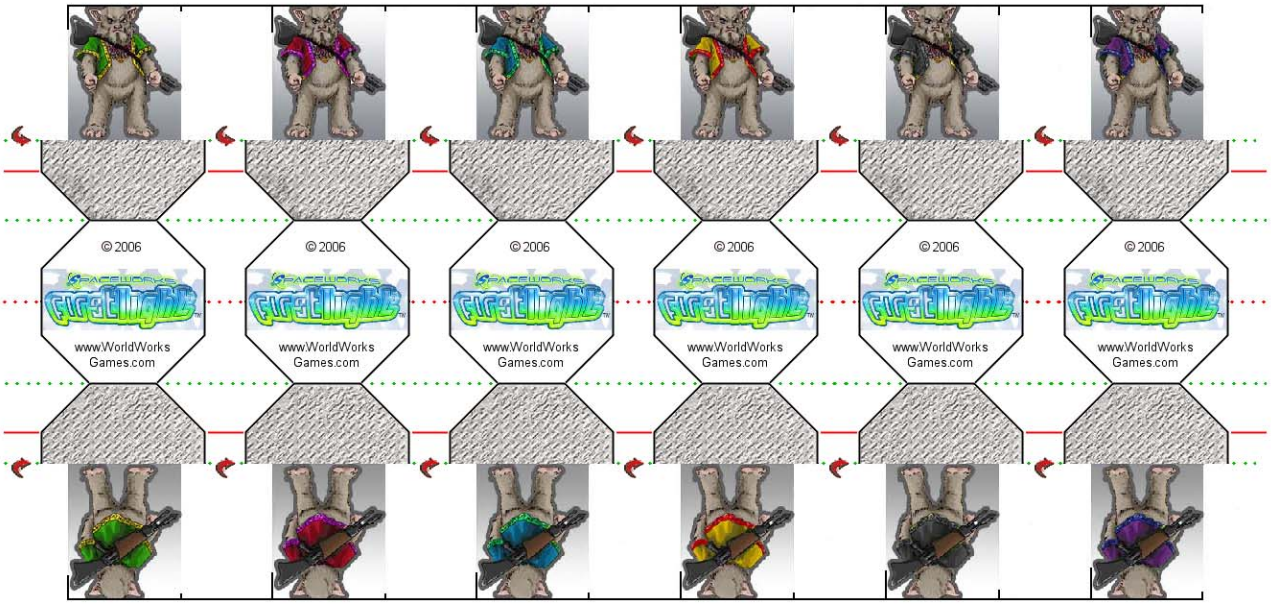

For the standees themselves, ignore the green lines. Fold on the dotted red line, gluing together a single flat piece, then cut on the solid red lines to produce a flat standee with a bit of an extended base (discard the rest).

Now on to the complex bases. Each side folds over (1), then up (2), down (3), and back underneath (4) to glue into place as shown. The end result should be a central slot to support the flat standee that should hold it tight and snugly
