Rattleground Island

A seemingly tranquil island paradise, Rattleground Island is home to a massive dragon turtle that lives in a giant cave under the island. Whenever he comes or goes, his massive shell scrapes against the rock walls of the cave and the whole island shakes and rattles like an eaerthquake.

Anagram

"Rattleground" is an anagram for "Dragon Turtle". It also sounds like "battleground". Maybe you can make a poem as a clue?

If the players don't figure it out on their own, a DC15 Intelligence check after they have been on the island for a while might reveal this fact. Or maybe after the Dragon Turtle Attacks?

Story Hooks

- A local leader hires the party to hunt the dragon turtle.
- The shipwreck in the bay when missing and the party has been searching for it.
- There is a massive nest of dragon turtle eggs in the caves. They will cause chaos if they hatch, but they are also extremely valuable.
- After resting on the island and hunting for food, the island starts to shake.
- They are given the "treasure" map by an old window who's husband disappeared years ago. He is living on the island... or perhaps inside the dragon turtle!
