Heavy Artillery

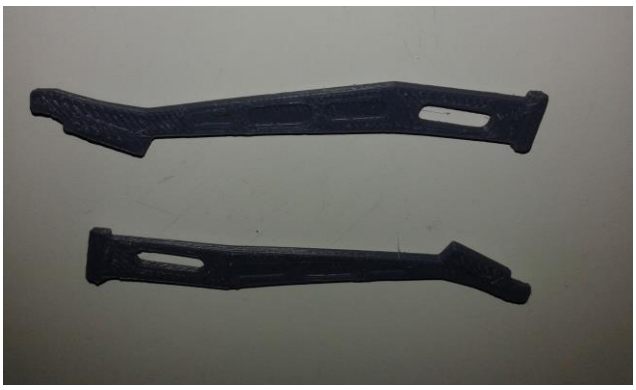

Assembly guide

1 – parts to print:

The three parts of the gun : top, bottom and breech.

Two time the leg

The body : body1, body2 and gun support

The shield : two times and **<u>the second mirrored</u>**

The wheels (x 8) and the wheel support (x 2).

2- Assembly :

Assemble the gun

Assemble Body1 and body2 around the legs (the legs are able to move, but you can glue them if you prefer).

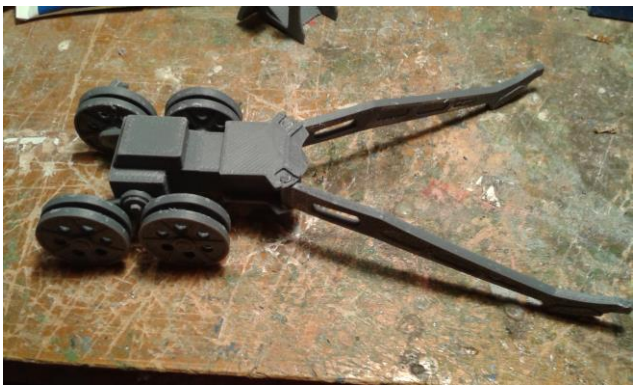

Assemble the wheels : four wheels for each wheel support

Glue both shield on the side off the gun support. Shield must be aligned with the front of the support and with the bottom edge. And glue the gun on the support (the flat square on the bottom of the gun is glued on the support). The angle off the gun is set by the angle of the support, the gun is not movable. Be careful to align the gun with the top front edge of the support.

Assemble the main body with the wheel support. Set in position before gluing the wheel support to be sure of the balance.

Glue the gun on the wheeled body and you’re done :

Hope all is clear, enjoy you big gun !
