DRONES & ATMOSPHERICS VOLUME ONE

A blasted heath. An alien planet. Cyberspace. A distant moon orbiting a dead world. The End of Time. Sometimes you don't need a specific ambience. Sometimes you just want there to be something...ambient. A background, an atmosphere, a drone.

The Drones & Atmospherics series gives you a variety of creepy, mysterious sounds to underscore your most unsettling locations. Each drone is six minutes long. We've given them names, because "Drone 1" and "Drone 2" wouldn't be very evocative. But don't just take our titles as gospel – use them for whatever you like!

Whether you're running a horror campaign, sci-fi opera, fantasy epic or anything in between, Drones & Atmospherics can be used in just about any RPG you wish!

Sounds include:

- Haunted Drone: an electronic hum supports random bursts of mystic energy that drift back and forth across an unearthly abyss.

- Ruins Drone: A wasted land? A devastated planet? The slow song of a dead people drifts across the shattered sky.
