DISTANT DRUMS

War is coming. For weeks now, the beating of drums has been heard in the distant hills and through the forest. Always pounding, calling forth the warriors of darkness for the first assault. The only question is, when will the attack come?

"Distant Drums" is a background sound of native drums pounding in the distance. While ideally suited for a Fantasy RPG, this ambience will work equally well in a horror campaign involving voodoo or the occult.

Distant Drums includes:

- Distant Drums - Island: Native drums pound in the distance of a tropical island.
- Distant Drums - Woods: Tribal drums pound in the distance of a large forest.
- Distant Drums - Rain Forest: Tribal drums pound in the distance of a tropical rain forest.
- Distant Drums - Drums pounding in the distance.

All effects are ten minutes long and loop seamlessly.
