E-Z BATTLEFIELDS

FAT DRAGON GAMES

BRIDGES

Before proceeding with this document, make sure you have read the beginners guide to card modeling included with this model set!

All pages have user selectable options for the graphics which you can adjust prior to printing. Please see the section on ‘DRAGON LAYERS’ in the Beginners Guide for more info.

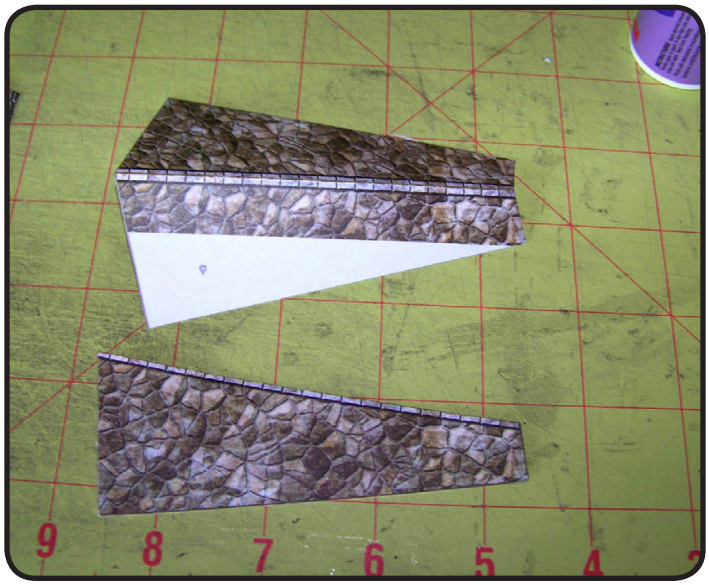

Bridge Ends

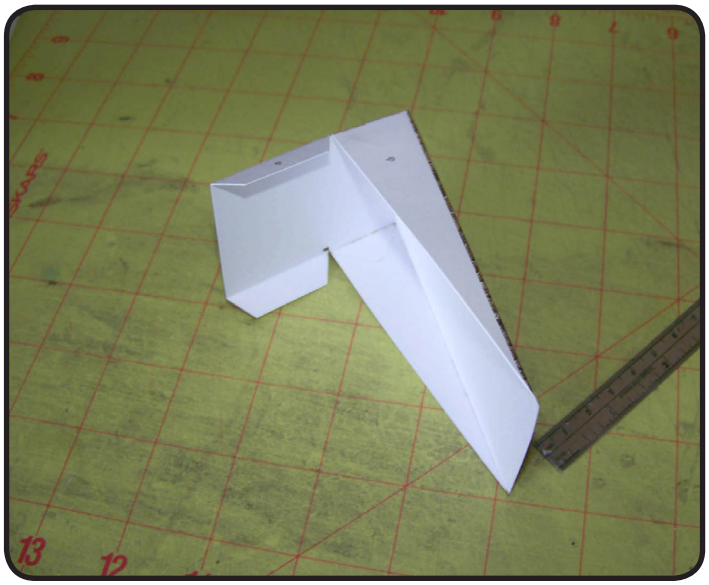

1: You can use any colored marker brand or acrylic paint to touch up your white fold and cut edges to make them less visible. We prefer to use Bic Mark It markers available at Staples and elsewhere. They're cheap (less than $1) and the colors work great. A light brown was used for all models in this set.

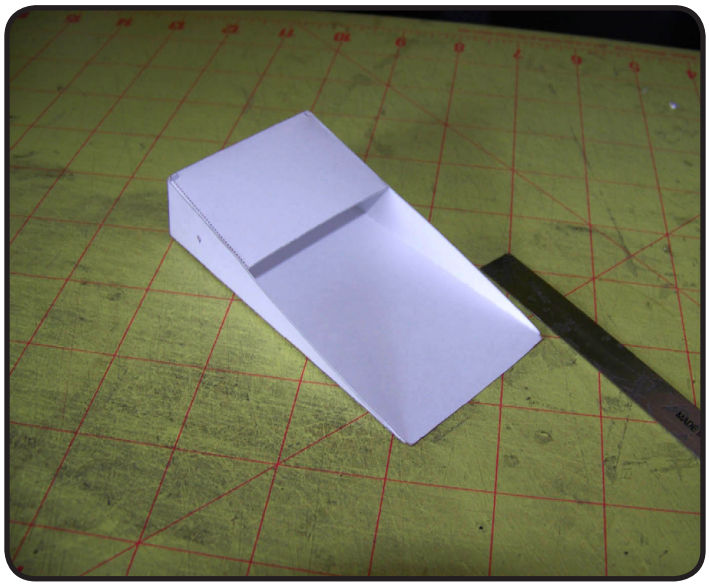

2: Cut, score and test fold an end model as shown.

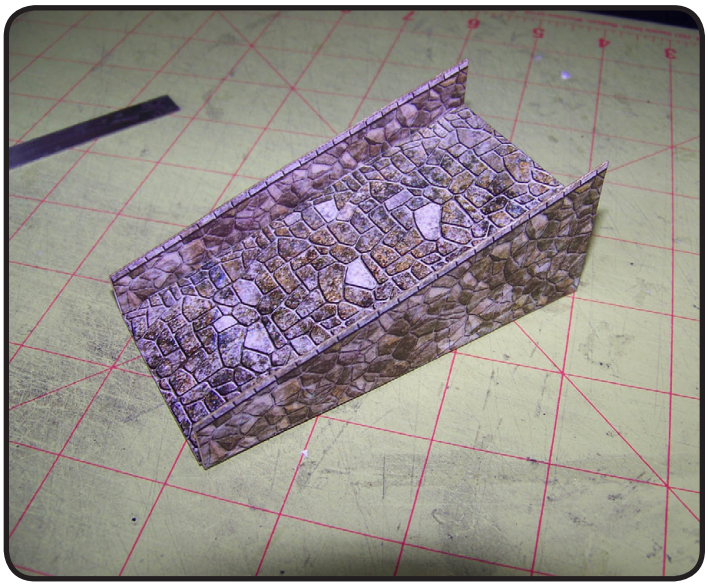

3: Fold and glue the side pieces in half and allow to dry.

4: Next fold over and glue the rear flap of the main piece and allow to dry.

5: Glue the bottom flap into place as shown.

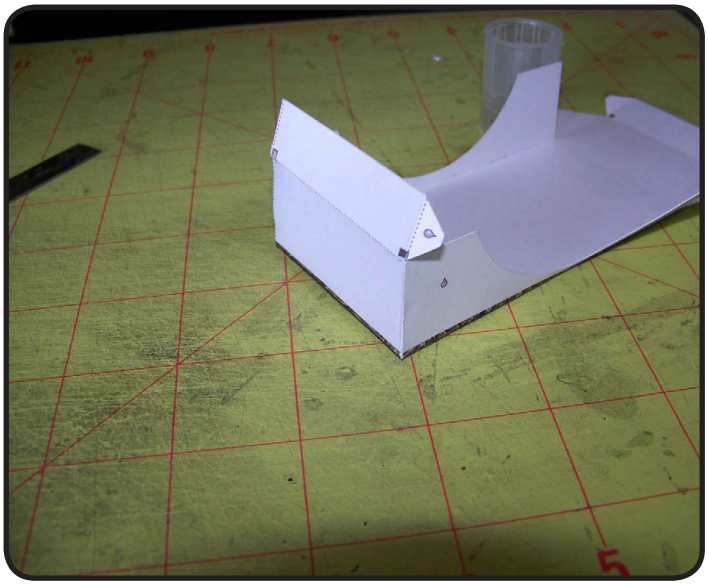

6: Glue the side pieces to the main ramp.

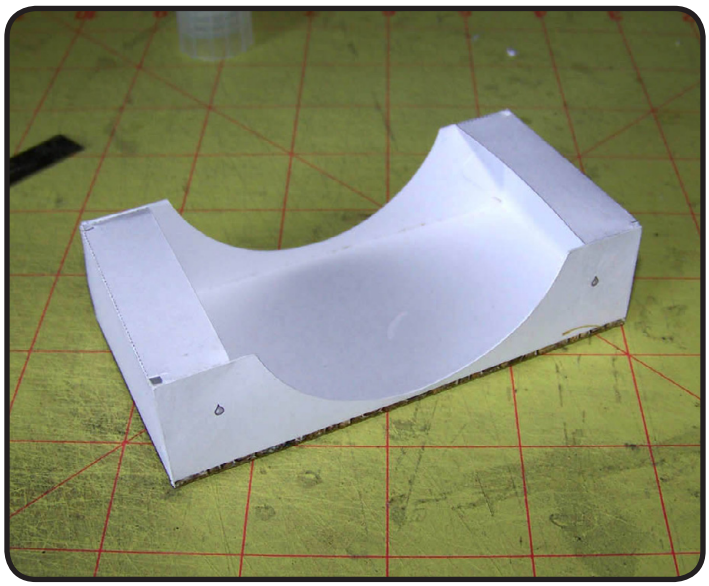

Main Bridge

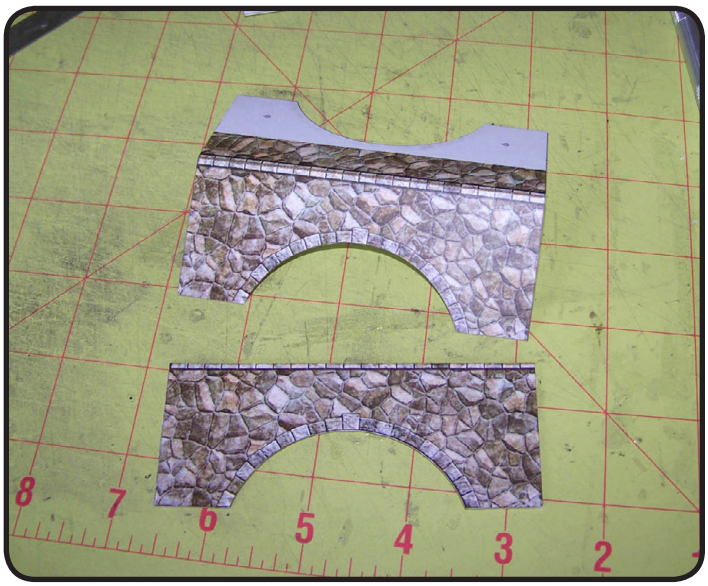

1: Cut and score all pieces as shown above.

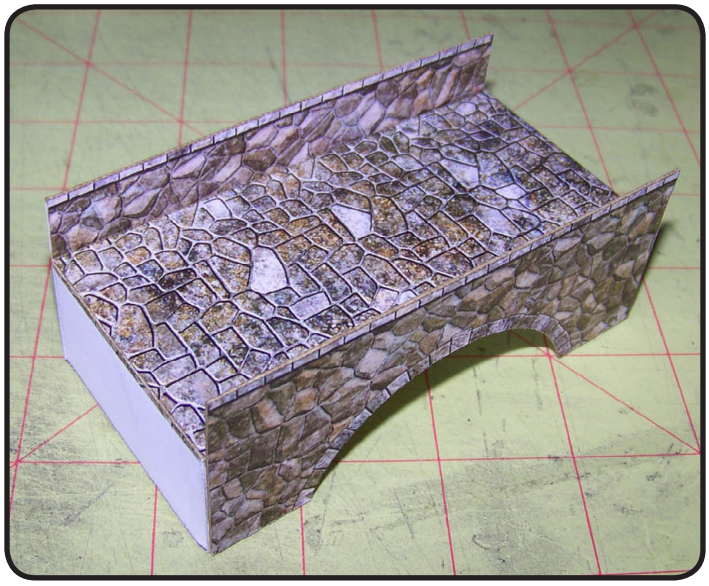

2: Glue the side flaps and allow to dry.

3: Glue the bottom flaps into place.

4: Fold and glue the sides in half as shown.

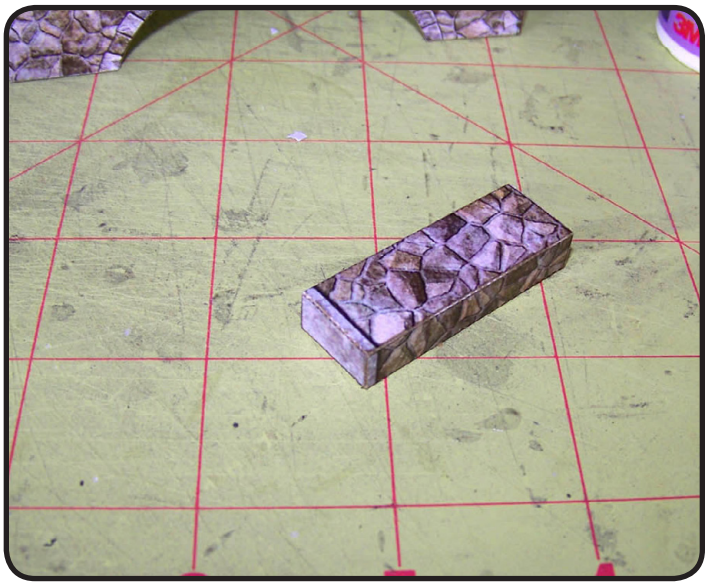

5: Glue the sides to the main model.

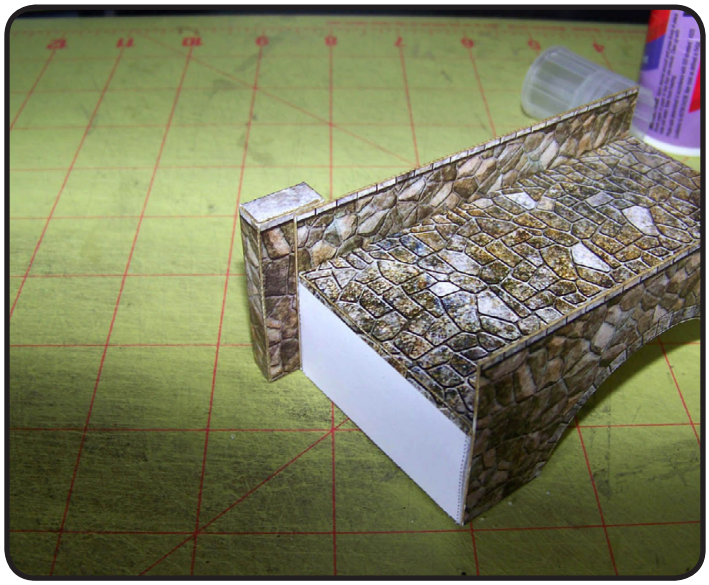

6: Cut and score the support models as shown.

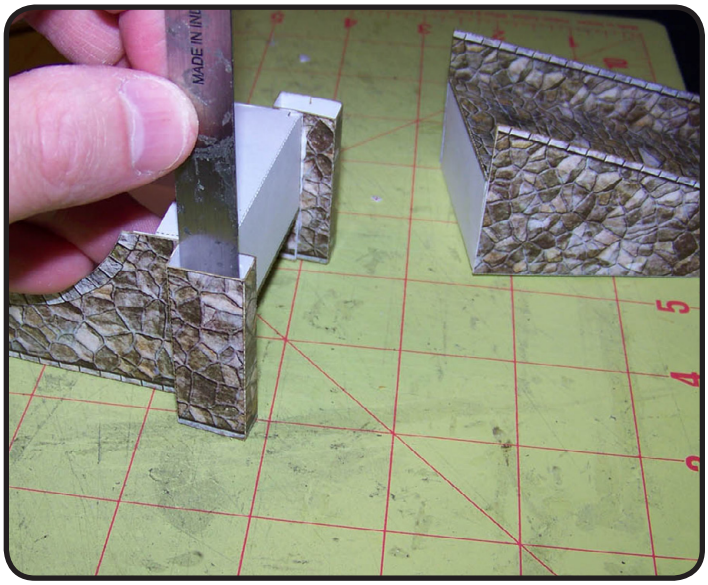

7: Glue the long side tab first.

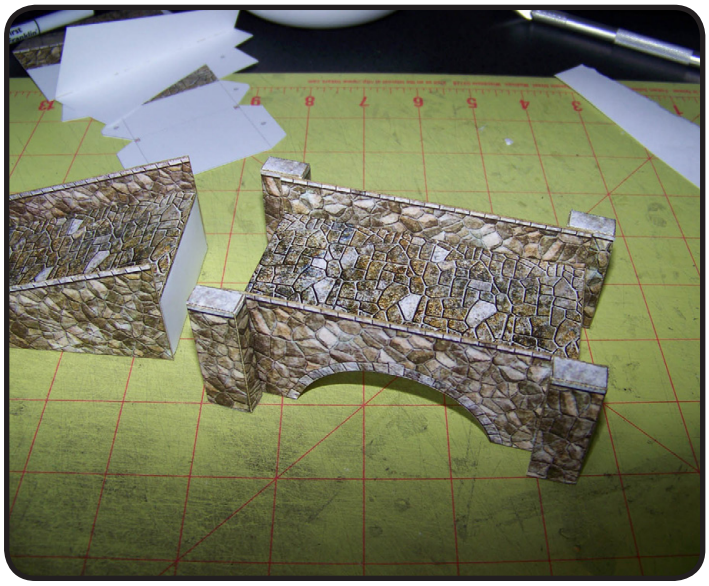

8: Finish by gluing the end flap.

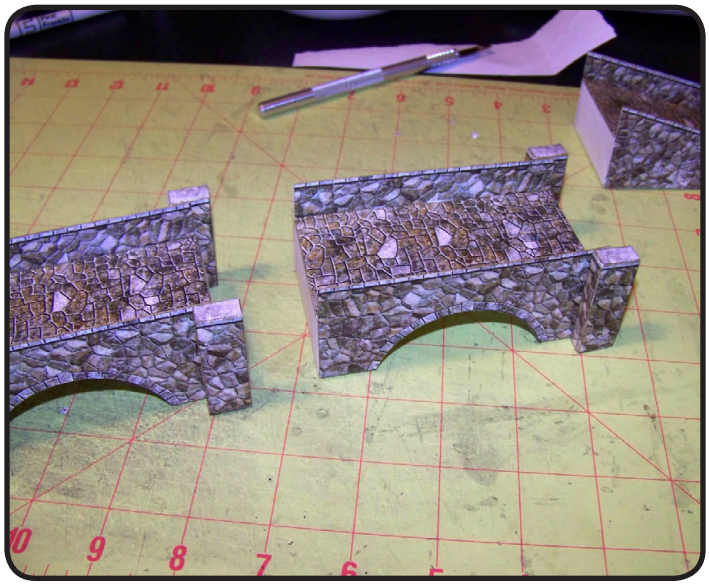

9: Glue to the ends of the main bridge model. Glue with half of the support extending past the corner of the bridge piece as shown above.

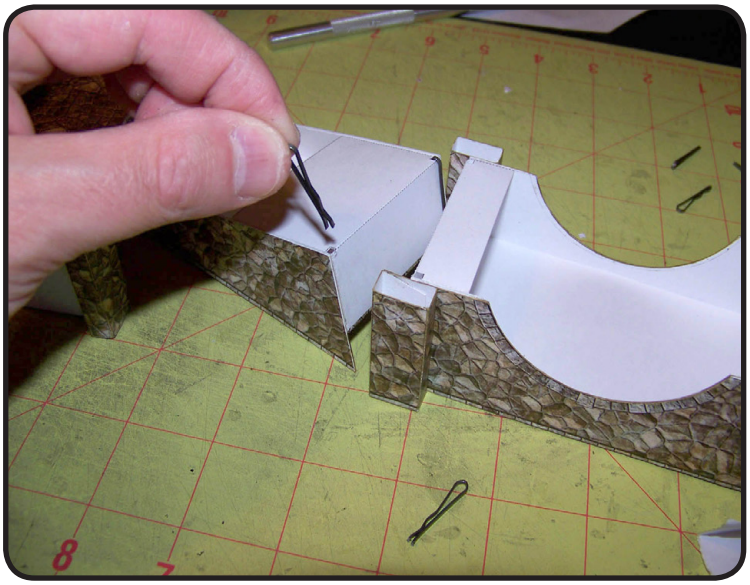

10: A small ruler or other straight edge can be inserted through the bottom to apply even pressure while gluing.

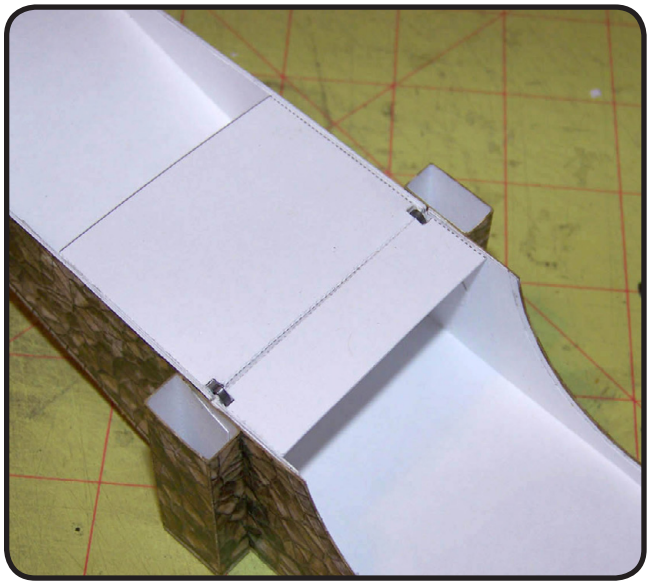

11: Your first bridge piece should have four supports (one on each corner.) We have included half-height supports in case you wish to have them at the end of each bridge ramp piece.

12: Each additional bridge section only requires supports on ONE END as the other end will plug into the previous section which will already have them (see above.)

All bridge sections are designed to connect with short bobby pins. We recommend you purchase short bobby pins for safety, but it is possible to cut down the more common larger ones with wire cutters. **IF YOU CHOOSE TO DO THIS EXERCISE EXTREME CAUTION AND WEAR EYE PROTECTION!!**
